

The Pest Control Video

All you need is a little knowledge

Pest Control

Why do people pay so much for pest control? Did you know that with a 20oz bottle of chemical that costs under \$60.00 a pest control company can make over \$3,000? Pest Control is a great business to be in because people are willing to pay for the service they think they can't do themselves or they think the chemicals are bad for them.

Well, it's time for you to open your eyes to the truth!

Ask yourself this question: Where do the big pest control companies get their employees? The answer is they hire people like you and train them. It's not brain surgery, so you don't need a college degree.

Ok, so you can go to the grocery store or Home Depot and buy chemicals, but it does not mean you are a trained pest control technician. All it means is you have the chemicals and you can read the labels on the containers... Let me ask you a question: If those containers came with a video to tell you how to use them, would you rather watch it than read the label?

A video is a picture and a picture is worth a 1000 words!

It amazes me when people ask me "where do these ants come from?" I tell them... and they feel...well...dumb! This is because they asked a question and got an answer that is elementary.

Pest Control is easy and safe if you just have a little knowledge.

The Pest Control Video was made to give you the information the technicians use to control insects in and around your property and home. It's very easy to follow and you will be amazed how easy and safe pest control is.

So, really, how much money can The Pest Control Video save you? Well... how much do you pay for pest control, or how many bugs live in your home rent free, or how long do you wait for the bug man to show up, or how do you feel about people walking all over your home spraying chemicals? **The Pest Control Video only cost \$19.99 one time!** You will no longer need a bug man and you'll learn how to treat your home from the outside in.

Many people are now doing pest control on their own with the knowledge they learned from The Pest Control Video and they also have a certified pest control technician that will help them month after month for free.
